
Background:

EXSYN Aviation Solutions designs and provides a variety of digital solutions, technologies and tools that can be used in the Aviation Industry to allow airlines and MRO companies alike to be more efficient, have lower maintenance costs and uphold a high safety standard. Our range of solutions focus primarily on the Aircraft Maintenance Industry and revolve around data processing, data analytics & visualisation, data hosting and related consulting services. EXSYN Aviation Solutions works closely with industry leading airlines, MRO's, and OEM's worldwide. We run our operations from our main office on the Amsterdam Airport, however our work field is global. As our customer base is growing we are looking for a:

Aircraft Data Consultant

The position:

As Aircraft Data Consultant, you will be part of the team within EXSYN Aviation Solutions that is responsible for the support of our customers and projects in the areas of Computerized Aircraft Maintenance Systems, Aircraft Airworthiness Data Management, and Aircraft Data Analytics. You will report directly to the Head of Operations and your main tasks will include:

- Participate as subject matter expert in customer projects related to aircraft maintenance data, implementation of information systems and maintenance data analytics
- Performs workshops as subject matter expert in customer delivery projects
- Programming of scripts required during Aircraft Airworthiness Data Transfers projects
- Provides consultancy to customers related to aircraft data and information systems within the assigned project
- Provides helpdesk support to customers
- If needed, undertakes small- to medium sized delivery projects

What we ask:

The suitable candidate should:

- Have a Bachelor degree in the field of aviation engineering, aviation management
- Have a minimum of 1 year experience in a similar position
- Have a good knowledge of SQL
- Have some knowledge of Aircraft Maintenance processes and MRO Software systems (e.g AMOS, RAMCO, Mxi, etc.)
- Have strong written and verbal communication skills
- Be willing to travel globally, as required
- Be pro-active
- Preferably have some knowledge of C++, PHP or HTML
- Be eligible for NATO II Security Clearance

- Be eligible to work in the EU
- Be willing to relocate to our company headquarters located in the Amsterdam area (Netherlands)

What we offer:

- Be part of a team which is on the forefront of technological change in the aviation industry
- An international working environment with opportunity to travel abroad
- Be a valued team member within the company
- A competitive package of secondary benefits

Contact:
